

Book Crossing- here is a short explanation of how to register and release a book into the wild.

www.bookcrossing.com

Getting labels-

1. Go to the store

2. Scroll down until you see – Free Downloadable Labels

Free Downloadable Label Files

Download label files and print them to your home printer onto standard label stock. Our labels are pre-numbered and designed for Avery 5163 or 5263, 10-up label sheets. The individual labels are 2"x4". You can print either 1 sheet (10 labels) or 10 sheets (100 labels) at a time. The BCID range you print will be automatically recorded as "belonging" to you, so that you or your organization will get credit as the original registrant of the books, as soon as someone comes to the site and creates a journal entry with one of the numbers.

Or better yet, you can easily activate your own prenumbered labels so that the book details are already filled in for the finder and so that you can make release notes on the books as well.

[Download 10 pre-numbered Avery 2x4" Labels - 60 KB](#)

[Hand-write a Note on or Inside Your Book](#)

3. Click on the option that says Download 10 Blank Avery 2 x 4" Labels KB
4. A sheet will come up with 10 different labels on them. Print them off!

Registering a Book

5. Go to the HOME tab to the left. Scroll down until it says "Register a Book"

Register Book

Instructions ▾

Registering a book is quick and easy. Just follow the 3 steps below to get your book's new BCID number. Then, if you plan to release the book "into the wild", make sure you also make [Release Notes](#) so other BookCrossers in the area can try to find it. **NOTE!** If you printed pre-numbered labels, you *already* have a BCID number for your book, so you should *not* register the book here. Instead, you should make a [journal entry](#) and/or [release notes](#) on the book.

Step One: Search for a Book

Enter the title or ISBN number of the book you want to register.

Locale: USA (amazon.com) ▾
